Site

The Palm tree T2, as highlighted within the report, seen in the photograph, and marked on the plan is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Alexandra Park Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed.

T2 Palm - Fell and treat stump with eco plugs (broadleaved).

- TO COMBAT SUBSIDENCE DAMAGE

Issues

I hold no objection to the removal of the Palm T2.

Foundations are shallow with roots found underneath. Soil moisture is low, and Driscoll's guideline shows desiccation at depth.

BRE Digest 251 category is 3.

The Palm tree is low grade and has little amenity value.

The tree is not worthy of further protection.

Recommendation

No Objection
