Hi Nice speaking to you and sorry for the delay in getting back to you

Kitchen fan to be removed and replaced with inline fan will be at a cost of £85.00 plus vat this includes all labour and the fan itself

The bathroom as discussed can only be done in surface trucking

To wire and fit a timered fan with surface trunking and a triple pole switch which has to be fitted outside the bathroom, 4inch diamond cut hole through the wall and a gravity grill fitted outside will be at a cost of £385.00 plus vat

Please feel free to ask me any other questions you may have

Look forward to hearing from you

Kind regards

Loui Doukaki

I just wondered whether you had had a chance to look at this and give me a quote.

I refer to my telephone call yesterday and, as requested, I am attaching photos of my bathroom where I need an extractor fan fitted. Flat 1 is a basement flat but the bathroom is on the ground floor.

The final photo (DSC 0033) is of an existing fan in the kitchen which is very old and ideally I would like updating. There is no window in the kitchen.

Please let me know if you need any further information.

I look forward to receiving the quotation.
