Submission: Support
Comments: As the direct neighbour to this property, we are keen that it turns into residential property and away from low grade commercial use which has been very disturbing to the community. Therefore we are supporting of this move and would be concerned if the council rejected it.

We would ask that in this transition process, the developer is required to fully carry it through in aesthetics. i.e. the commercial elements of the property such as the industrial yard gates (2m high heavy steel gates topped with spikes) are replaced with something more fitting to a residential area.
