Comments: I have serious concerns about the loss of a green space amenity for local residents. I understand the problem of litter but believe that this would be alleviated if the park was better used - the hundreds of new homes due to be built along Monument Way would provide more pedestrians and residents who could make use of the park. Indeed, the additional housing makes it even more important that small pocket parks are maintained for public use. If permission is granted it would be good to see the school commit to working with local residents groups to allow some communal access to the park - I understand that the school are willing to do this but it would be helpful if this could be part of any agreement.
