Submission: Neither
Comments: This is further to my 1st objection no. 005 on 2 April '15 and in reply to the Agent, Mark Kelly's email of 9 April '15.
There is no possible response to the loss in value for my house which was bought in late 2012 as a SEMI-DETACHED house with no warning of any possible alteration. To turn it instead to a house in the MIDDLE of a row will reduce its value significantly and completely negate an important advantage that led me to buy it, and pay more, in the first place. I cannot emphasize enough this loss of value and position.

I have no objection to a house being built on this site, only that it should NOT be attached to 15A.

As to the Agent's promises as to change of design and sound insulation, what faith can we have in the plans and statements? It all seems rather uncertain.
