FOR THE ATTENTION OF: LISA COWAN

Dear Lisa,

RE: BROOK HOUSE, 881 HIGH ROAD, TOTTENHAM – COMPLETION OF ECOLOGICAL MITIGATION AND ENHANCEMENTS

We can confirm that all recommendations for ecological mitigation and enhancement as outlined in Viewpoint's Extended Phase 1 Habitat Survey Report, Biodiversity Plan, BREEAM Ecological Assessment Report and Code for Sustainable Homes Ecology Assessment Report have now been implemented, and approved by a suitably qualified ecologist. These include the creation of green and brown roofs and the installation of bat and bird boxes.

All "Key" recommendations and 30% of "Additional" recommendations for ECO 2 of the CSH report have therefore been implemented, and all recommendations for protecting and enhancing site ecology for LE04 of the BREEAM report are also now complete

Yours Sincerely

LIZZIE BARKER
ECOLOGIST
