Submission: Objection
Comments: I am strongly against this development for the following reasons:
1. The building will block out valuable natural light for residents in the Hale Village development 2. A high-rise building will spoil the surrounding landscape 3. The Hale village development is growing rapidly and more residents will lead to more noise and reduced space for current residents 4. The new building - and new residents - will reduce parking spaces which is at a premium already within the village and surrounding areas 5. The new build will result in higher service charges, rent and utility costs 6. The construction will have further detrimental environmental impact on the surrounding area 7. The land space can be better used as an open recreational green space for residents

I hope these comments and others will be taken into serious consideration.

Sincerely,

Suraj Pillai
