
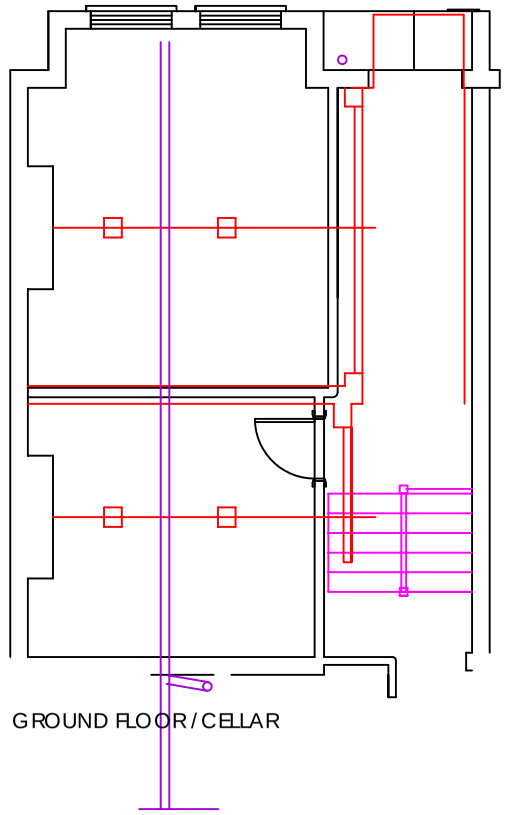
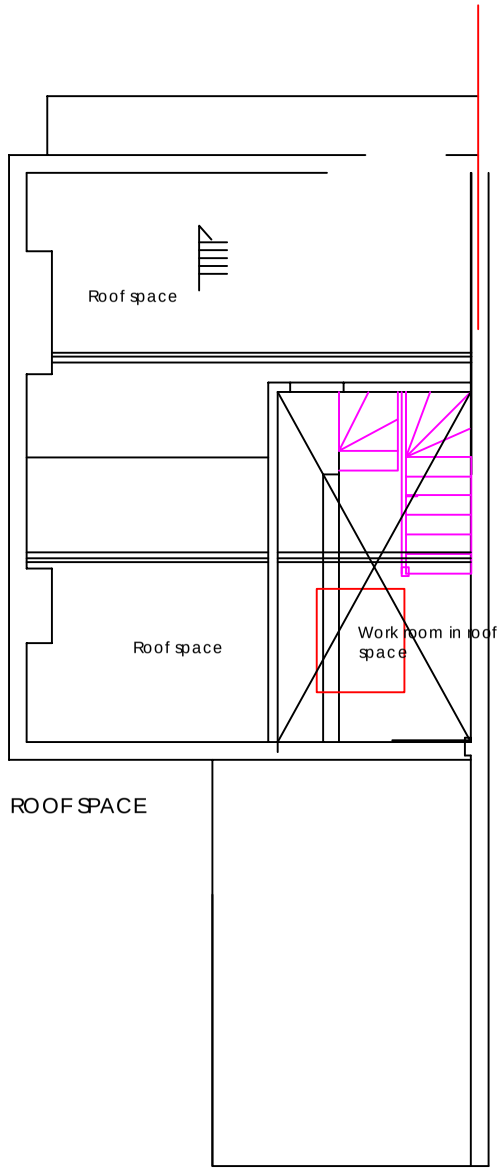
FIRST FLOOR

Ground Floor plan with superimposed cellar walls to determine the drain location. Main rooms have brick piers supporting timber cross beams to halve floor span.
Spine wall is supported from below

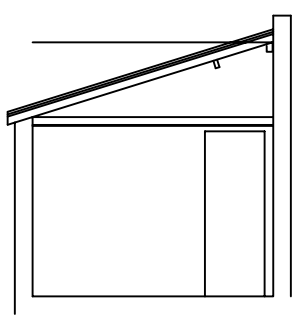


GROUND FLOOR / CELLAR



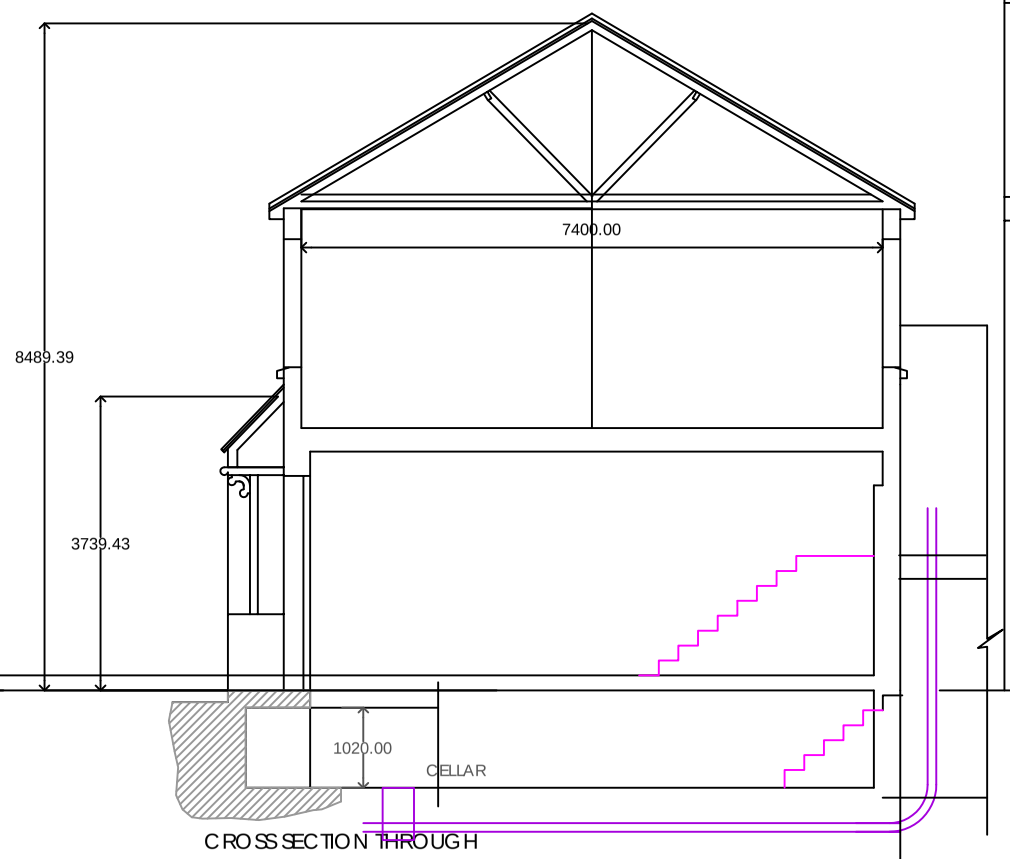
Floor dropped in this area to allow use of space in roof. Now fitted with Velux window and used as study.

ROOF SPACE

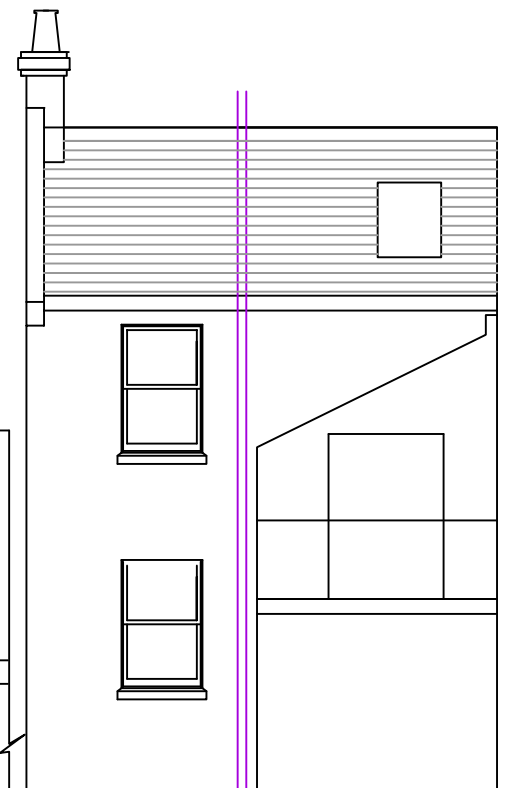


FRONT ELEVATION

This house and its partner are a pair of Edwardian semi-detached houses built to infill a terrace when the access road to the New River was removed.



CROSS SECTION THROUGH PORCH, ALL FLOORS



REAR ELEVATION
