Comments: I don't think miss Alison's comments are accurate. The property just two doors next to miss Alison's, has the same pitched roof characteristics as proposed in the plan. Blake road also has many properties with the same pitched roof characteristic as in the plan application.

Pitched roofs are much safer than flat roofs and hence will reduce the risk of the roof collapsing unlike flat roofs.

Blake road properties are very mixed with flat front roofs and pitched front roofs, and therefore I believe that the proposed plan will not only provide a safer roof, but will also enhance the property and the appearance of the street.
