Dear Stephen,

I note that the transport team have no substantial concerns. Yes of course I am happy for my site representative to meet to discuss implementation on site that isn't in the CMP, we would do that as a matter of course in any event. As regards the final two bullet points there will of course be further liaison in relation to the access licence and the parking suspension. I know we need to deal with those matters. I think these should more properly appear on the discharge as informatives rather than conditions, but if you feel they need to be conditions I would prefer that to no discharge at all, as given all the time that has passed we really do need to make progress.

Kind regards,

Sebastian Eiseler
