Proposa Shopfront alterations including addition of glazing to openings

This application is for replacement signing, shop front alterations and addition of glazing to opening at the Nando's restaurant at 106 Stroud Green Road.

The replacement signage includes projecting signs and a projecting fascia, these are being replaced in the same location as existing. From the transport perspective anything overhanging the footway needs to be a minimum of 2.1m above the footway, the only dimension given on the drawings is 3100mm to the underside of the circular sign, however it is apparent that the other projecting fascia/signage is clear of the minimum 2100mm required.

For Head of

No objections from the Transportation perspective.
