Submission: Objection
Comments: We are concerned that the upper floor of the proposed two storey extension would end up very close to our property roof and that this may cause us problems with access for roof maintenance. In particular, we are concerned that there might not be room for scaffolding to be put in place for any such maintenance work, or for future loft gable extension plans. We would ask that this be looked into, and then taken into account when the decision is made, especially if it appears likely that it would cause such issues for us in the future. If it can be demonstrated that no such issues would occur then we have no objection to the work.
