London Fire and Emergency Planning
Authority runs the London Fire Brigade

Date 3 August 2016
Our Ref 31/215942
Your Ref HGY/2016/2159

Dear Sir

RECORD OF CONSULTATION

REGULATORY REFORM (FIRE SAFETY) ORDER 2005 ARTICLE 45
OTHER (specify): Town and Country Planning Act 1990

SCOPE OF WORKS: Demolition of a single-storey 1 person flat at ground floor level followed by building a two-storey 1 person dwelling on the existing footprint
PREMISES: FLAT A 55 SCALES ROAD TOTTENHAM LONDON N17 9HD
PLAN NUMBER(S) (if any): Plans as of Planning Portal.

The Brigade has been consulted with regard to the above-mentioned premises and makes the following observations:

The Brigade is satisfied with the proposals with regard to fire brigade access.

This Authority strongly recommends that sprinklers are considered for new developments and major alterations to existing premises, particularly where the proposals relate to schools and care homes. Sprinkler systems installed in buildings can significantly reduce the damage caused by fire and the consequential cost to businesses and housing providers, and can reduce the risk to life. The Brigade opinion is that there are opportunities for developers and building owners to install sprinkler systems in order to save money, save property and protect the lives of occupier. Please note that it is our policy to regularly advise our elected Members about how many cases there have been where we have recommended sprinklers and what the outcomes of those recommendations were. These quarterly reports to our Members are public documents which are available on our website.

Any queries regarding this letter should be addressed to **Ray Shields**. If you are dissatisfied in any way with the response given, please ask to speak to the Team Leader quoting our reference.

Yours faithfully,

Assistant Commissioner (Fire Safety Regulation)

The London Fire Brigade promotes the installation of sprinkler suppression systems, as there is clear evidence that they are effective in suppressing and extinguishing fires; they can help reduce the numbers of deaths and injuries from fire, and the risk to firefighters.
