We do not accept this studio/workshop conversion to be used for business purposes.

The height of the proposed studio/workshop cannot exceed 2.3 metres.

The Proposed studio/workshop cannot exceed 3.5 metres from rear garden fence (11.5 foot). We do not accept a 600mm gap then a further 4.4m protrusion.

The noise pollution is a major factor which must be considered. My wife suffers from vertigo and cannot tolerate major amounts of noise. This will need to be controlled. Doors will always need to be closed while working.

We will not tolerate any dust or debris from work. A decent dust extraction unit will need to be in place. We dry our clothes in the garden.
