Re: Objection to proposal- HGY/2020/0905

Location: 5 Eve Road, London, N17 6YD.

Proposal: Demolition of existing side infill extension and construction of replacement side infill extension.

I strongly object to the above proposal on the basis that natural light will be severely restricted to my property.

The position is the existing Lean-to structure is constructed of corrugated plastic.
The plastic frame does not, therefore, (To any great degree) restrict natural light flow to the two ground floor side rooms of my property. The submitted proposal stipulates that the existing frame shown on photographs A, B and C. will be demolished.

Its replacement will entail the construction of a tall solid brick wall (that does not exist now)

The construction of a solid brick wall will significantly restrict natural light. The added height of the new structure will also, inevitably exacerbate the problem

Please refer to the illustration of the proposed replacement marked D.

I am formally requesting that the submitted planning permission application is not approved.

Thank you.

Ms.J. Samuel.
