Comments: Concerning the application for the rear single storey elevation, we would like to ensure the flat roof must never be made accessible as a terrace that would lead to a loss of privacy for neighbours, or be used to display plants etc. that could fall in windy conditions. We would also kindly request the drains to the extension to be done in a manner fitting with the character the houses and to be as discreet as possible. We would further request that the drains do not come down on the side 71 Cranley Gardens. We have some concerns that the current height of the extension will block out light to the patio at the back of 71 Cranley Gardens and as result will be overbearing and out of character. But in principal, we do not object to the application.
