Submission: Objection
Comments: I wish to object to this application and find it incomprehensible that work has been completed on this property and people are living there when the actual application is in a state of flux.
The style and height of this property have been constructed in such a way that they are very much out of character with the rest of this and surrounding street.
They also allow neighbours to be overlooked and feel 'closed in' by the current dimensions of the building.
It also needs investigating what effect (eg cracking and undermining of the structure of nearby properties) the excavations have had eg if there has been lowering of floors. Cracking (some of it severe) has been reported in some nearby properties which had not been the case before this work was started and this is unfair on the owners of those properties.
I urge the Council to consider these issues so that the integrity of the whole street can be retained.
