CON/2022/0310: 17 Highgate Close N6 4SD

G1 2 Conifers fell to ground level These are close to the wall and starting to cause damage to the wall. They are also approx. 3M from the property and the owner is worried about subsidence to the house.

T1 Apple Fell to ground level This is close to the wall and starting to cause damage to the wall. It is also approx. 3M from the property and the owner is worried about subsidence to the house.

We are against the felling of virtually any trees in light of the global climate and environmental crisis.

This application should be considered in the context of application HGY/2021/1725 where the applicant has been given permission to extend the rear extension across the full width of the building and out into the garden. The trees were marked on the plans and were not marked as to be removed. That permission was granted on the grounds that the applicant would follow the plans submitted with that application. Had the application been submitted with reference to the trees, we would have commented.

Any potential problems with subsidence may be addressed when the extension is built.
