Submission: Objection

Comments: This would be a complete obstruction so close to our balcony and many others who also live in these new apartments. My partner and I have worked incredibly hard to buy the flat with this view and we were told that nothing would obstruct it when we bought it. It would have an incredibly negative impact on the residents here and the area we live in. This would be damaging to the area and the neighbourhood and would negatively impact growth in this area which we take pride in as a community. I 100% object this proposal.
