Submission: Objection
Comments: I inform the relevant authority that I OBJECT the planning application for the mast to be installed for the following:

1. Misleading and incomplete information in the project description and public information. This is proposed directly in front of an area consisting of 4 blocks of residential and office buildings with balconies facing and within direct view of the mast.
2. Disruption of the character and appearance of the area including inescapingly dominant and unpleasant encroaching street scene prominence.
3. Road and traffic safety.
4. Outdated and misleading information in the Town Planning Policy Maps and Public Information
5. Issues affecting the success of the project, signal efficiency and coverage of the antennas.
6. Health hazard considerations in relation to the increasing population density in the area and 24/7 prolonged exposure to EMF.
7. Improper antennae siting community consultation, incomplete and without timely notification regarding the transmitter placement.
