Submission: Objection

Comments: As the people who will be most strongly affected by this application I most strongly object, although I doubt it will make much difference considering the mind boggling decision Haringey Council made in the first place by allowing two homes to be build in somebody's back garden! Firstly this wall is iconic and is part of the listed grounds, there is zero reason why it should be touched as it does not effect the developers current work. Most importantly the wall sits along our property line that we own, you cannot take the wall down without entering our property which we do not consent to. The developers have already been very careless and demolished every garden stone in our alleyway during work, we cannot trust that they would be able to remove this wall and repair it without causing further damage to our property.
