Submission: Objection

Comments: As the owner of 4 kings Road I strongly object to this application. Over the past few months of building we have suffered nothing but pain and misery due to this unwanted redevelopment and also had our property destroyed by the builders and this has still not been repaired. The listed wall if knocked down will cause an opening in our front garden whilst work would take place and it would not be secured from tresspasses. We have also taken much pride in our front garden and do not want our garden disturbed our damage whilst the wall is knocked down. The builders during their work so far have destroyed a dozen of our garden paving stones which they need to pay to replace, if this work went ahead I have no doubt that our property would suffer further damage from ruthless developers. The Council so far have bended over backwards for these developers with zero consideration to current residents of Kings Road, but it is clear that money talks when it comes to deciding on these proposals for Haringey Council. Again I must stress that as the people who would be directly affected by this work that we well and truly oppose this as we were guaranteed time and time again by the developers that the wall would be remaining in place. Haringey Council please stop consistently moving the goal posts and have some consideration for residents who have lived on this street for over 50 years!
