Submission: Objection

Comments: I would like to object to this application, I have lived at number 4 for 12 years and my husband has lived in this property his whole life. The work currently being carried out in the garden of 2 Kings Road has had a dramatic effect on my whole family's mental health. How the council thought it was acceptable to allow two new houses being built in a back garden is still a mystery to me, the new houses have been built literally 3 feet in distance from the side of our home and has already caused damage to the property. Knocking down the wall at the side of our home would only add to our misery and would in fact most likely damage our front garden and also leave our property exposed whilst the work takes place. We also have young children in the house and we already have the unsafe scaffolding on the property to worry about, we don't want a wall being knocked down whilst the children use the front garden. It would be advisable for the council to not agree to this proposal as there is no need for the wall to be touched and the new owners had already told my family that the wall would be remaining in place due to its listed status.
