Site

The tree is situated in the rear garden of the property. It is publicly visible as the corner garden is at the junction with Dukes Avenue.

A site visit was deemed necessary to determine the appropriateness of the proposed works (20/09/2022).

The location is also within the Muswell Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

Copper Beech - Reduce by upto 2-2.5m on all aspects. Reason for work is to let more light into garden and restrict root growth affecting adjacent wall.

Issues

I hold no objections to the proposed reasonable tree works. The pruning works will prune back to the previous points. The tree has responded to similar works in the past.

This will keep the tree in scale to the surroundings.

No objections had been made on the previous notice CON/2020/0471. These works were never carried out, and this notice is still within the permitted two year timescale.

Recommendation

No Objection
