Subject: URGENT - 5 day tree removal notice - 8 Broadlands Road N6 4AN

Hi all

I hope you don't mind me contacting you using emails from a few years ago when we last communicated. Hopefully at least one (all?) of you are still helping with trees in Haringey.

Please can you help us?

We recently moved into 8 Broadlands Road N6 4AN. We have just had a tree surgeon visit the home to quote for reducing some trees in our back garden.

However, upon leaving he identified that one of our large beech trees (under TPO) in our front garden has **meripilus giganteus**. According to the surgeon (LC Treecare), the meripilus is advanced and is eating away at the root plate of the tree. In his opinion, the tree could fall over at any time. He says that it is already leaning.

I attach photographic evidence of the tree in question.

This is really urgent as the tree is very substantial and could hit multiple houses / cars / people in the event of collapse.

As such, please confirm receipt of this email and that permission is granted to remove the tree on Thursday 6th October (the earliest he can do the work). Due to the urgency of the situation, we will proceed with the work on Thursday 6th October (the earliest he can do the work) unless we hear back from you and/or Haringey.

If someone could advise us that would be amazing as this has never happened before to us and we appear to be looking at a very big, dying tree.

Kind regards,

Ben Rogoff
