Submission: Objection
Comments: OBJECTION.

This is the same Lime tree (T1) referred to in application HGY/2021/3593.

It is the subject of a Tree Preservation Order, although this is not acknowledged by the applicant/agent in the associated application paperwork.

This tree was previously reduced to the resemblance of a post. It has only just begun to recover. Having witnessed the way in which this tree has previously been 'reduced' I strongly object to this application as given the incorrect and minimal information submitted by the applicant, I feel it is unlikely that any such reduction will be made appropriately.
