Site

The various species of trees T1- T36, as marked on the sketch plan, are situated in the rear play area and grounds of the school. They are indiscernibly visible from Nightingale Lane and Eastfield Road.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

Part of the location is within Campsbourne Cottage Conservation Area. This protects every tree with a diameter at breast height of >75mm.

Issues

I hold no objections to the proposed tree works. The site has been surveyed, by the agent, with duty of care in mind.

The proposed reasonable works are standard specification, good husbandry and within good arboricultural practice.
