Site

The mature Oak *Quercus robur*, as marked on the plan, trees are situated in the rear grounds of the property. They are not publicly visible.

A site visit was deemed necessary to determine the appropriateness of the proposed works (10/08/2022 at approximately 14:00).

The location is also within the Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

Crown reduce by 3m height, 1m flat's side, 3m school side to T1 and T2 *Quercus robur*, prune away from building by 2m on flat's side only to T3 *Quercus robur*.

Issues

I hold no objections to the proposed pruning works.

From a site visit and meeting with the contractor it is evident that the adjacent structures are with close proximity with the Oak trees.

The Oaks have a widespread and pulling them back would benefit the site and be considered reasonable tree works.

Recommendation

No Objection
