Site

The mature Lime tree, as marked on the plan, is situated in the front garden of the property. It is publicly visible and forms an avenue of Limes.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

Five Day Notice to cut down Lime tree that is completely rotten as is full of decay in the main trunk and it is very dangerous.

Issues

I hold no objections to the removal of the Lime tree under a five-day notice.

It is clear from the photographs the extent of the sunken cavity, longitude cracks, and the probe (Silky pruning saw) full length of the blade to the handle hilt being lost within the trunk.

Mattheck's t/R has been breached and compromised.

There is a condition to re plant dead, dying and dangerous trees within a Conservation Area.

Recommendation

No Objection

Condition: Re plant *Tilia tomentosa* 'Petiolaris' 10- 12cm girth.
