Product description

For an atmospheric outdoor environment, you have to go to Baleno II. This wall lamp has light on both the top and the bottom. This creates a nice ironing effect on the wall. Baleno II is made of aluminium with glass and is finished in black. It has a depth of 10.2 cm, height of 21 cm and length of 8.3 cm. The mounting plate has a depth of 2 cm, height of 21 cm and length of 8.3 cm. You complete the wall lamp with 2 AR70 light sources, each of which has a GU10 fitting (max. 35 Watt). Make sure you order these separately. Baleno II has a motion sensor, with which it detects movement and the lighting switches on when movement occurs. It also switches off again at the time you set. The wall lamp has an IP value of IP44 and is therefore splash-proof. Perfect for next to the front door or on the garden shed. Make your outdoor environment safe with the modern Baleno II wall lamp.
