B Murphy have been asked to supply and fit a new double glazed dormer window, which will be hand built at our workshop in Muswell Hill, using traditional methods.

The existing dormer window is not original or in keeping with property and has been manufactured in a stormproof style, the proposed window will have traditional flush casements, with ovolo glazing bars.

The existing dormer window needs to be totally replaced as it is rotten and beyond repair

The new joinery will be made from red Grandis, which is a certified hardwood from sustainable sources, and will be hand painted to a white finish.

The glass specification will be 4mm Planitherm toughened 8mm Krypton gas cavity 4mm float toughened (16mm double glazed unit) achieving a center pane u value of 1.2 Wm/k
