Application date	08/09/2022	
Tree Inspector	DM	Date: 1 st November 2022

Site

The mature Oak *Quercus* spp. tree T1, as marked on the sketch plan, is situated in the rear garden of the property. It is publicly visible from street level.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The tree is protected by a Tree Preservation Order.

Proposal

Tree works proposed:

T1: Oak (20m): Fell – Tree has excessive dieback at the crown, exudations on the trunk and decay at the base.

Issues

I hold no objections to the removal of the Oak tree.

It is clear and evident from the photographs that the tree is:

- In major decline
- Bleeding canker all over the trunk
- Lifting plates 360 degrees around the circumference of the trunk
- Decay at the base showing degradation of lignin
- The tree has become a hazardous

There is a condition to re plant for the loss of the tree

Recommendation

No Objection

Condition: Re plant with Hungarian Oak *Quercus frainetto* 10- 12cm girth
