Submission: Neither

Comments: Something to add of note about the proposed plans are that the drawings of our home space at 22 are a little inaccurate, in the sense our outside wall is not placed as shown - Our back outside wall ends at end of the shaded area. And we have no internal wall inside as shown

In addition the trees shown are not to each side as per plans - only one tree line directly in front of the proposed extension window which if built to full depth the worry is it may be lost which would affect privacy etc as described in prev comment
