Submission: Objection

Comments: I object to the works that are being proposed to Haringey Sixth Form college. The grounds in question are directly in front of our building, with clear views into our bedrooms. Building on this site will directly compromise our privacy and block sunlight to our premises.

It will also increase the noise, students and staff already make a lot of noise in this area, but it's currently manageable as they only seem to gather on that side occasionally. Creating a space designed for students to gather in that area will drastically increase the noise and disturb residents in this building throughout the day. Many people here have small children who sleep during the day time, I think there may even be a few people who work night shifts - it's unreasonable to expect us to hear a constant stream of noise from that area.
