Submission: Objection
Comments: I received a notification of an application of planned works to the garden space next to Haringey Sixth Form centre.

I am a homeowner of one of the properties that backs on to the garden directly and would be extremely disappointed to see this area built on. One of the reasons my partner and I purchased our flat was because of the view of the nature reserve out of our window.

This would compromise the privacy of my property. My bedroom window is on direct line of this site. This site is also in line with the bedroom of my young son. The last thing I would want are teenagers being able to have a clear view of my bedrooms. This area would also compromise the sunlight that shines on our shared garden and the back of property.

I also work from home, the noise and dust disruption from the construction of this site would be detrimental not only to my work but my wellbeing.

If the plans go ahead to build at this site, the noise from the students would be equally as disruptive.

This area is also a huge contribution to the ecology of the area. I have seen foxes, ducks, herons and various other birds thrive from the pond on this site.

I would strongly oppose this site being used for the construction of classrooms when there are several unused car parks surrounding the sixth form centre that could be considered to build on.
