Submission: Objection

Comments: I firmly object this proposal as I have already endured months of unrest due to the existing building site at 7 Endymion Road. The builders of that site have consistently not respected the laws of which work times can begin and end which has lead us to submit numerous complaints to the council. As this new proposed planning application is on the same site I can only assume that the laws will again not be respected and our sleep, rest and relaxation will continue to be disturbed.

The planning application of 7 Endymion Road and the car park that is at the rear of the property did not include nor suggest any further development on the site. Therefore they have not given proper indication of their intention with the site at the detrimental effect on those that live surrounding 7 Endymion Road and 2 Alroy Road.

Furthermore the suggested site of the property will severely impact the availability of natural light in 8 Endymion Road rear garden. With the garden in question already surrounded by two buildings (one at the top and at the back of the garden), a third will cause the garden to receive little to no light majorly affecting the growth of plants and the enjoyment of said garden by the occupants.

If the building site continues with the planned proposal this will have a direct and damaging effect on mine and my partner's mental health due to continued sleepless morning and continuous loud noises. We have already had to endure much of these negative impacts this year 2022 and such planning application for this continue for a much much longer time is inconceivable to our health.
