Submission: Neither

Comments: We have concerns that the front roof pitch (shared pointed style dormer no windows) which joins our property(number 8) to number 6 will look uneven and out of place with other properties on the street. Its not clear on the submitted planning application how this will look. We would like further drawings provided for how the roof lines and front pitch of the shared dormer will meet each other and look from the street. on the planning application drawing submitted CW-0254-210 rev000 pdf - 01 West elevation drawing does not show how the raised step up in height will affect our property, ours would be lower and their roof line higher so we would like an expanded drawing of how the shared front dormer will be seen from the street so we can fully understand how it will affect the look of our property in relation to number 6.
many thanks Dan de Sausmarez
