Submission: Objection

Comments: This application seeks to achieve permission for a 'Proposed roof terrace and change existing window to a door for access to roof terrace'.

The existing dormer at the rear of 41, Alison Road overlooks the garden and back bedroom of 46, Beresford Road where I live. Whoever is using the dormer space is able to see directly into the back bedroom of 46, Beresford Road in a way that clearly invades my privacy. The dormer space appears to be in use most days by a person who appears to be working from home using a computer placed on a table.

The roof terrace is accessible from inside the property as there are two blue chairs and a table placed outside on the terrace. The dormer appears to already have full length glass doors leading out onto the roof terrace.

In the light of the above this would appear to be a retrospective application for planning permission for something which already been built i.e. the roof terrace and door to access it.

My objection is to the invasion of my privacy by having a roof terrace which would clearly overlook both my garden and rear bedroom.
