Submission: Objection

Comments: I write as a very concerned long term Haringey resident and someone who has seen a number of mature trees felled locally for the purposes of insurance claims. It has not resolved the issue as my own and neighbouring properties still suffer subsidence and a number of mature, beautiful and valued trees, planted over 100 years ago are gone for our lifetimes. I still miss all of them and very much wish there had been someone around then to explain there may be other options. For example what about reducing the tree in size? Try that first but to fell a mature plane like is a short term and cheap option which is highly unlikely to resolve the problem and may cause further issues. I object to this application.
