Submission: Objection
Comments: It is essential that Haringey finds an alternative solution to these insurance claims where they are held to ransom by insurers. There are and have been too many if these recently. This tree has a TPO and can be reduced in size by pruning etc. As our climate heats up we need all our mature trees which provide cooling and a healthy environment. The applicant must be forced to find an alternative solution- Haringey's tree policy and climate change policy must be brought to bare in this instance and specialist tree advice sought.
