Submission: Objection

Comments: The tree that is under threat of felling is a mature tree which provides shade, oxygen and habitat for birds and insects. All of these are necessary for a healthy urban ecosystem for humans and non humans. Haringey must honour the TPO and not give in to another insurance company which has been taking premiums to do necessary work on the buildings they insure. Haringey has a duty to the population of Muswell Hill and the whole of the borough to preserve, maintain and nurture every existing mature tree. There is a climate crisis.
