Submission: Objection

Comments: This loft extension is essentially turning the property into a HMO, with at least 6 bedrooms. We should be protecting the family housing stock we already have in this area, so that single family dwellings are enhanced. There are 1,600 new homes being built in Tottenham Hale and some of these are available right now - they're more suitable for people who wish to live on their own. If we have at least 6 people living in this house there will be additional stress on parking, water & drainage, schools and healthcare which isn't factored into the demand planning.
