Hi Martin,

Please see requested additional information attached. Including

- Updated NRMM register with dates;
- Noise monitoring approach; and
- Re-issued logistics plan with the location of monitors indicated.

Thanks,

Matt

Hi Martin,

Good afternoon. Can you please ask your admin team to upload all the latest attachment on planning portal for this application? I'm currently on the page and this has not been done.

In addition, the requested information as regards item A of our last comment on dust monitoring location and pollution team access to the monitoring result is not yet submitted by the applicant. The current submitted information is in respect of noise.

Moreover, we need confirmation of the start and end date for the nrmm registration as well as statement confirming the relevant guidance position as noted in item B of our previous comment. The submitted inventory on this is not sufficient to address our concern in respect of this.

Regards,

Kenny
