

Objection to Planning Application HGY/2022/3549

I would like to lodge an objection to the above planning application. The proposal to widen the house across the alleyway to the height of two storeys would represent a considerable eyesore when facing the house from the street and is completely out of keeping with the structure and style of the houses on this stretch of Langham Road. This element of the works in particular would lead to considerable disruption for residents nearby (and extend the build time) for the gain of relatively little floor space.

It is also worth noting that the house has already been extensively extended over the years, including a large 'shed' in the garden which is regularly used as an extension of the existing house and is equipped with plumbing and electricity. There are questions as to whether this house has been - piece by piece - developed by the applicant beyond reasonable permitted development in advance of this application being brought forward.
