

Installation of 5m pole sign

This application is for the erection of a 5m pole sign within the petrol/electric filling/charge station at this site on the Roundway.

From the submitted drawings it shows the totem sign to be fully within the site, extending vertically up at a location adjacent to the inbound vehicle entrance off the Roundway. There appears to be kerbed protection around the base of the sign to prevent vehicle impacts/contact and the signing is associated with the installation of 4 new electric vehicle charging points within the site.

There appears to be no direct impact on the public highway from the proposed location, either from proximity or overhanging, so this should be acceptable. However, the public highway at this location is under the control/management of TfL, so they should be consulted if they have not been already. The Roundway is part of the Transport for London Road network.

Otherwise, no objections from the Haringey Transportation perspective.
