I've checked the details of this application and the comments in condition 5 concerning refuse storage at this address.

The containers indicated reflect the waste streams we would expect in accordance with the guidance (refuse, mixed dry recycling and food waste). These are provided with a secure storage unit, close to the entrance gate and accessible for collection. It is noted that in the original application there was reference to extra off[1]street storage for garden waste located in the undercroft zone, at the lower ground frontage. If Haringey are to provide a garden waste collection service, this waste will need to be brought to ground level and the service is subject to a charge.

More details of the waste and recycling services provided by Haringey can be found at [Refuse and recycling | Haringey Council](#)

On this basis I support the discharge of condition 5 concerning the refuse arrangements.

Please let me know if there is any other information you need concerning this.

Kind regards

Ann
