Site

The Horse Chestnut *Aesculus* spp. tree T1, as marked on the sketch plan, is situated in the front garden of the property. It is publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works (19/12/2022 at approximately 13:30.)

The location is also within the Crouch End Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

T1 Horse Chestnut in front garden: remove, in order to safeguard foundations, path and wall.

Issues

I hold no objections to the removal of the Horse Chestnut. The tree has been managed as a pollard, has poor morphology, decay within the union, causing direct damage to the wall, and is not worthy of a Tree Preservation Order.

Recommendation

No Objection
