[HGY/2022/4366 - 13 Cromwell Place, Hornsey, London, N6 5HR](#)

TI - Sycamore Tree - Reduce canopy by cutting back from tips of all branches radially by 3-4 metres leaving the canopy balanced

There is no photo attached to this application, nor is there any tree report. It is difficult to see the impact of this tree on the local area but we note that 11 Cromwell Place, next door, recently made an application to fell an elder and an ash along the same boundary with the reservoir. [HGY/2022/4314](#)

While we understand the need to remove this tree, we are also aware that many trees were, and are *to be, felled on the Thames Water reservoir site (Tile Kiln Lane)*. *This, in combination with other fellings in the area, has led to a loss of tree cover and habitat. We would ask the Tree Officer to suggest that the applicant plants a suitable replacement tree in line with policies in the Highgate Neighbourhood Plan.*
