Site

The Limes and Damson trees, as seen on the sketch plan and photographs, are situated in the rear garden of the property. They are not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Fortis Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

2 x Lime trees: pollard to stem leaving standing trunks only to regenerate new pollard

4 x Damson trees: reduce crowns by 25-30% and prune branches 1.5m length.

Issues

I hold no objections to the proposed reasonable works. The specification for the Limes are repeat re pollards and the works to the Damson trees are reductions within good arboricultural practice and husbandry.

Recommendation

No Objection
