Site

The Sycamore *Acer* spp. tree, as seen in the photographs, is situated in the rear garden of the property. It is not publicly visible.

A site visit was not deemed necessary to determine the appropriateness of the proposed works.

The location is also within the Stroud Green Conservation Area. This protects every tree with a diameter at breast height (taken at 1.5m) >75mm.

Proposal

Tree works proposed:

Five Day Notice: one of the four Sycamore trees in the shared garden is basically being held up by the ivy that was covering it - inside it's like sawdust and hollow. The tree needs to be removed ASAP as it is unsafe.

Issues

I hold no objections for the removal of the Sycamore tree, after clearing of the ivy at the foot of the tree has revealed that it is decayed at the base and clamp of the tree (large cavity).

There is a condition to re plant dead, dying and dangerous trees within a Conservation Area.

Recommendation

No Objection

Condition: Re plant 10-12cm girth *Acer* spp.
